In 2024, the main revenue will come from Airtime services. In 2024, the Company had a net profit of Baht 5 million, an increase from the previous year, which had a net loss of Baht 754 million.

Financial Position

As at December 31, 2024, the Company and its subsidiaries had total assets of Baht 3,193 million, a decrease of Baht 1,407 million from the end of the previous year. Total liabilities of Baht 2,886 million, a decrease of Baht 1,524 million from the end of the previous year. The shareholders' equity of Baht 307 million, an increase of Baht 117 million from the end of the previous year, resulting from the issuance of convertible debentures during 2024.

Miss Boonrut Mongkolratanakorn invited the shareholders to raise question or express opinion. The questions and answers were summarized below:

Mr. Adirek Pipatpatama Volunteer for protecting the rights of shareholders, Thai Investors Association	What is SDC's plan for the next 3 years to have sustainable income without returning to losses in order to clear the accumulated losses up to Baht 5,574 million?
Finance Team	In the next 3 years, SDC will continue to focus on the DTRS business as the main business because the income from airtime is in the form of recurring income and has a high margin, which will be able to generate income and profit for the Company sustainably and continuously. If the Company has income and profit that is stable to a certain level, then it may be considered with the remaining accumulated losses.
Mr. Adirek Pipatpatama Volunteer for protecting the rights of shareholders, Thai Investors Association	SDC has total debt of Baht 2,885 million, resulting in an interest burden of Baht 119.57 million per year and a D/E ratio of 9.4 times. I would like to know how the Company manages its high debt and interest burden so that it does not have to be called back immediately.
Finance Team	In order to manage interest expenses and D/E ratios at appropriate levels, the Company must generate additional income and profits so that this additional cash flow can be used to pay off debt. This will reduce debt, which will result in lower interest expenses and D/E ratios. At the same time, the Company still has to monitor and negotiate with financial institutions on loan repayments to be appropriate in terms of both amount and time, so as not to default on debt and be called back for the loan.

Mr. Adirek Pipatpatama Volunteer for protecting the rights of shareholders, Thai Investors Association	SDC has been marked CB Caution due to the shareholders' equity is less than 50% of the registered capital. Please provide the solution to avoid being suspended from trading or being delisted.
Finance Team	The solution to the CB Caution is that the Company must focus on finding new customers, especially from the DTRS business, because the income from this business is in the form of recurring income and has a high margin. If there are more customers, it will result in the Company having profits and shareholders' equity increasing steadily, reducing the risk of being suspended from trading or being delisted due to negative shareholders' equity.
Mr. Adirek Pipatpatama Volunteer for protecting the rights of shareholders, Thai Investors Association	The products of SDC are currently risky and highly competitive. How does the Company plan to find new customers in addition to the two main units in order to create sustainability?
Mr. Supavas Prohmvitak Executive Director	DTRS communication equipment is a device that is used to provide voice communication for mission critical or disaster situations in particular because the communication is based on the stable and secure TETRA system. It is the system chosen by public safety agencies in many countries, so there is a low risk that other communication technologies will replace TETRA's capabilities in supporting mission critical missions. Nowadays, those who want to enter this business have to invest a lot of money to build a network system. Therefore, there are almost no competitors in this business. As for the approach to finding new customers, the Company will focus on finding agencies that need communication equipment to support mission critical tasks in various industries. Especially in the Public Safety group, where there are still many gaps and business opportunities. The Company will increase the number of customers from this group to create sustainability for the Company in the future.
Mr. Adirek Pipatpatama Volunteer for protecting the rights of shareholders, Thai Investors Association	As stated in the report in solving "CB" Caution, the Company will focus on managing a wider range of industries and managing the work system including cost control in various aspects to be more efficient. I would like to know the current progress, and the Company has any other measures to resolve this issue.
Mr. Watchai Vilailuck Chief Executive Officer and Mr. Supavas Prohmvitak Executive Director	The Company has started negotiations with various industries in coordinating budget preparation, such as the Department of Highways, Tourist Police, Emergency Medical Institute, Department of Land Transport, Department of Airports, and Department of Ports, etc. to encourage these industries to switch to using the DTRS communication system. If the negotiations are successful, the Company will have more customers. This results in increased revenue, profit and shareholders' equity. If the number of customers increases to a certain amount, all equipment impairments can be reversed (currently, a total of Baht 800 million in equipment impairments have been recorded). The shareholders' equity of the Company will increase significantly, which is the important approach to remove the CB Caution. In terms of controlling expenses in various aspects to be more efficient, the Company has continuously implemented the measures.
Mr. Adirek Pipatpatama Volunteer for protecting the rights of shareholders, Thai Investors Association	As disclosed in Note 19 to the 2024 financial statements, the Company was unable to maintain the financial ratios as agreed with the financial institutions. As a result, the loan of Baht 1,566 million became repayable at call. The Company has classified these loans as current portion. The Company has received approval from a financial institution to adjust the terms and extend the loan repayment period and is in the process of negotiating with another financial institution. I would like to know about the progress of the negotiations and the possible impacts if the negotiations do not turn out as the expectation of the Company.
Finance Team	At present, the Company has received approval for adjustment of terms and extension of the loan repayment due date from all financial institutions.

No shareholders raised further question or expressed additional opinion, Miss Boonrut Mongkolratanakorn requested the meeting to consider and approve the Company's financial statements for the year ended December 31, 2024.
